## General opioid taper guidelines (adapted from resources below):

- Gradual tapers can often be completed anywhere in the range of 2 weeks to 6 months. Slower tapers may be necessary for patients who have been on high-dose opioids for longer periods.
- Do not reverse the taper; it must be unidirectional. The rate may be slowed or paused while monitoring for and managing withdrawal symptoms.
- The decision to first taper long or short acting opioids should be based on the type of pain the patient has (intermittent vs constant), their total daily dose of opioids, and patient preference.
- Start with a taper of ≤10% of the original dose per week and assess the patient's functional and pain status at each visit.
- During opioid tapers, we suggest that you see the patient every 2-4 weeks.
- Patients on fentanyl patches should be transitioned to a different long-acting opioid, then tapered according to the long-acting guideline. IMPORTANT: reduce dose to account for cross-tolerance.
- Multiple non-opioid medications are available to treat withdrawal symptoms (ie clonidine, anti-emetics).
- Tapering plan may be reassessed if pain/function deteriorate or withdrawal symptoms persist- if the dosing schedule needs to be adjusted, you will need to submit a taper plan modification.
- Do not treat withdrawal symptoms with benzodiazepines or additional opioids.

## **Opioid Alternative Pain Management Options**

These are suggested alternatives and this is not an all-inclusive list. There may be specific authorization requirements or restrictions for alternative treatments. *If you have questions regarding specific opioid pain alternatives, please contact the CCO directly.* 

- Alternative medications: NSAIDs, gabapentin, amitriptyline, nortriptyline, acetaminophen, topical agents.
- Counseling: Available to all patients for mental health, pain management, and alcohol and drug abuse.
- Massage therapy: Subject to authorization requirements
- Physical/Occupational therapy: Subject to authorization requirements
- Chiropractic manipulation: Where available, Subject to authorization requirements
- Acupuncture: Where available, Subject to authorization requirements

CCO variances may exist. Please refer to CCO information or contact the representative for more information.
